

INSTRUCTIONS FOR EXAM 1
EN 585.601 - Physiology for Applied Biomedical Engineering
Material Covered: Weeks 1 - 5
Exam Administered During: Week 7

1. The exam will become available to you at 00:00 hours (12:00 AM) US east coast time on Day 3 (Thursday) of Week 7. Your completed exam must be returned by 23:59 hours (11:59 PM) on Day 7 (Monday) of Week 7¹.
2. To access the exam log in to the course Blackboard site, go to [Course Modules](#) (left side of Home screen) ► [Exams](#) (at bottom of Module list) ► [Exam 1](#)
3. ***When you click on Exam 1 you will get a screen of instructions. Do NOT click on Continue until you are ready to start taking the exam.***
4. When you are ready to take the exam (you have a clear 2 hour time slot to work in) click Continue; the exam will open.
5. For Questions 1 - 14 (A, B, C, D type questions²) click the bubble next to your choice of answer. You will be able to scroll up and down within the exam; you may answer questions 1 - 14 in any order; you can change your answers at any time BEFORE you submit the exam. These questions will be graded by Blackboard.
6. Question 15 will require you to click on (and download) a pdf containing questions 15 - 18³; do it. **Leave the exam open while you answer questions 15 - 18.**
7. You can print out the file with questions 15 - 18 and type your responses onto the hard copy in the spaces allowed for each question. Alternatively, you can cut and past the questions into your own document (e.g., Word) and add your written responses that way. You can then **convert that file into a pdf**. The end result is that you will have to upload the completed file (questions + responses), **in pdf format**, into Blackboard as instructed. I will grade these questions. You may include Figures in your responses if you think them to be necessary - such Figures may be copied from books or papers; be sure and cite the source. You may hand-draw Figures - they must be READABLE. **Do NOT hand write text responses or calculations; all text responses and calculations must be typed.**
8. Once you have uploaded the completed part of the exam (questions 15 - 18) you need to click on Save and Submit; once you do that you are finished with the exam.

¹ If this is a Spring semester course Day 7 (Monday) of Week 7 is the beginning of Spring break; no work may be assigned or made due during Spring break. So - you may submit the exam on Day 7 of Week 7 if you wish to OR you may submit it early, prior to the beginning of Spring break. There will be a penalty for late submission. Refer to the Course Schedule. If this is a Fall semester course - never mind.

² These will be similar in style, content, and degree of difficulty to previous A, B, C, D type questions seen in homework assignments.

³ These will be similar in style, content, and degree of difficulty to previous problems in which you had to calculate things, draw a Figure, describe/discuss/explain something, or write a text explanation of why a statement is not correct.
